WASTEWATER RATES

Wastewater rates are based on water consumption. The minimum base rate per month is \$22.87. Like water, the first 667 cu. ft. of water are FREE. For usage at 668 cu. ft. and above, the rate is \$4.57 per 133.34 cubic foot of water consumed.

Wastewater rates are figured on a rolling average. We read your actual water consumption each year from January to March and divide by three (3) to find your average usage. Starting in April until the following April, that rate will lock in and remain constant.

If you move into your house or business mid-year, wastewater rates are based on the actual monthly usage until we get an average consumption.
